**Mobility Equipment**

**Crutches**

**Underarm Crutches**
Offer the strength and durability of wooden crutches with the ease and weightlessness of aluminum. Latex free rubber accessories and 1” adjustment increments on both handle and height provide a precise fit for users 3’10” to 7’4” with a weight capacity of 250 pounds.

**Forearm Crutches**
Aluminum crutches with vinyl-coated, 1” solid aluminum cuffs, cushioned vinyl hand grip and extra-large crutch tips. Available for patients 3’10” to 6’6” with a 250 pound weight capacity.

**Canes**

**Single Point Canes**
Available in multiple colors each durable cane has a contoured handle with foam handgrip, complete with a convenient wrist strap and rubber tip to provide comfort and security. Height adjustable from 29”-38” with a 250 pound weight capacity.

**Quad Canes**
Offering additional stability and comfort with secure rubber tips. Quad canes are available in narrow or wide bases. Can accommodate heights from 4’10”-6’4” with a weight capacity of 250 pounds.

**Walkers**

**Standard and Bariatric**
Dual button folding walker with secure rubber tips available in youth, adult, and extra-wide sizes. Can accommodate up to 400 pounds but weighs no more then 7.5 pounds.

**Rollator - Standard**
Ergonomic hand brakes provide safety and security while the large cushioned seat and removable padded backrest gives the user additional comfort and support. Flip-up seat and folding frame makes for easy transport and storage. Eight-inch wheels make it perfect in any terrain. Available in a wide variety of colors and comes complete with large basket. 275 pound weight capacity.

**Rollator - Heavy Duty**
Extra-wide design accommodates larger users. Eight-inch wheels are great for outdoor use, also available in multiple colors and include a large front basket. 375 pound weight capacity.

**Gait Trainers**

**Front Facing**
Support can be customized by choosing the appropriate prompts, all of which are designed to adapt to the changing needs of each child.

**Rear-prompt**
Designed to make walking less energy consuming, improve alignment, and maximize potential for walking.
Manual Wheelchairs

**Standard**
Weighing 36 pounds, the standard wheelchair can accommodate weights up to 250 pounds and is available in seat widths of 16, 18, and 20 inches.

**Lightweight**
This wheelchair weighs 34 pounds and can accommodate persons up to 250 pounds in seat widths of 16, and 18 inches. The 20 and 22 inch seat widths have a weight capacity of 300 pounds.

**High-strength Lightweight**
This wheelchair is ideal for those needing a more customized wheelchair due to poor strength and/or endurance.

**Ultra Lightweight**
Designed for the extremely active wheelchair user, the ultra lightweight wheelchair is highly customized for performance and positioning. Is available in pediatric and adult sizes.

**Heavy-duty**
Designed for those weighing up to 450 pounds, the heavy duty wheelchair has reinforced upholstery and frame. Is available in 18, 20, 22, and 24 inch seat widths.

**Bariatric**
Available in widths up to 30 inches. The dual heavy-duty cross braces have a weight capacity of up to 1000 pounds.

**Tilt in Space**
For use with pediatric and adults, the tilt in space wheelchair provides the optimal solution for complex seating and positioning needs. Offers exceptional pressure relief and growth adjustments.

**Transport**
With a lightweight frame, this chair is designed for easy transport and storage in vehicles and during air travel.

**Recreation**

**Tricycles**
Custom-built bikes which allow children of various abilities to experience the thrill of riding a bike.
**Power Wheelchairs**

**Consumer Power**
A compact design which allows for exceptional maneuverability. Is outfitted with van-style seat and back cushions.

**Rehab Power**
A wheelchair with the ability to add seat and back cushions. Meets the needs of clients with more complex needs.

**Power Tilt**
Enhances comfort through improved positioning and pressure relief.

**Power Recline**
Provides improved pressure distribution and positioning.

**Bariatric Power**
Power wheelchairs designed to accommodate clients up to 500 pounds.

**Power Seat Elevate**
Allows improved independence during transfers and the ability to access items that otherwise would be out of reach.

**Power Stand**
Provides clients the opportunity to bear weight through lower extremities while driving.

**Scooters**

**Three Wheeled**
A mid-size scooter that offers travel range, foot space and comfort for a variety of consumers. The small turning radius makes this the ideal choice for assisted living and apartment life.

**Four Wheeled**
The stable four-wheel base handles varying surfaces with ease. Can be customized to fit the consumer by simply adjusting the seat height, armrest width, and tiller angle.

**Heavy-duty**
The heavy-duty scooter offers power, range and stability ideal for outdoor driving.
Accessories

Oxygen Tank Holder
A convenient and safe way to secure oxygen when using a scooter or power wheelchair.

Safety Flag
Provides increased visibility when using a scooter outdoors.

Crutch/Cane Holder
An ideal solution for those requiring a cane or crutch when transferring from a scooter or power wheelchair.

Walker Holder
Secures a walker during transport on a power wheelchair or scooter.

Rear-view Mirror
Provides rear visibility when operating a scooter.

Rear Basket
Provides additional room for user’s personal items.

Headrest
Padded and contoured to provide head and neck support.

Walker Wheels
Designed for smooth movement over multiple terrain and provides added stability. Five-inch front wheels, complete with glide tips, are available for youth, adult or extra-wide walkers.

Walker Basket
Plastic coated wire basket attaches to front of walker providing extra security for personal items.

Walker Tray
Made from easy to clean durable plastic, the folding tray is perfect for carrying food and other items from room to room. Tray conveniently folds down and can remain attached to folded walker.
Platform Walker Attachment
The flexible handle provides an easy grip and reduces hand strain while the cuff cradles the forearm for comfortable weight-bearing. Made from sturdy aluminum with a weight capacity of 300 pounds.

Walker Cloth Bag
Available in multiple sizes and colors, the cloth bags attach to the front of most walkers and is a great way to keep personal belongings safe and nearby while adding some style.

Walker Ski Gliders
Easy and secure installation into walker shaft creates a smooth glide.

Walker Glide Caps
Plastic guide caps offer a smooth motion forward while prolonging the life of your walker’s rubber tips.

Ice Gripper
Provides extra stability on snow and ice. Flip up design aids in easy storage when not in use. Attaches easily to most canes and crutches.

Cane, Crutches and Walker Parts
Latex-free replacement parts such as hand grips, underarm pads, and rubber tips make your mobility products look and feel like new again.

Cushions

Seat Cushions

Basic
Designed to provide comfort at an affordable price.

Positioning
Contoured to provide stability, positioning, and long lasting comfort.

Skin Protection
Supports the pelvis and thighs for exceptional positioning as well as pressure relief for clients with skin concerns.

Custom
For clients who require additional support, a molding is taken to allow for an exact fit.
**Back Cushions**

Basic
Provides gentle support and facilitates good posture.

Positioning
Provides positioning support to the torso to promote spinal alignment.

Custom
For clients who require additional support, a molding is taken to allow for an exact fit.

**Miscellaneous Cushions**

Wedge
The cushion relieves pressure and prevents back pain by suspending your tailbone over the specially designed cut-out section. The wedge shape tips your pelvis forward for the proper sitting position.

Obus Forme
Back and seat cushions designed to promote proper spinal alignment. Can be used in the car, office, or home.

**Standers**

Sit-to-Stand
The modular sit to stand design encourages ongoing compliance with existing standing programs. Support options can be added to accommodate the needs of various abilities.

**Beds and Mattresses**

**Beds**

Hospital Bed
Hospital beds are needed to offer positioning for particular medical conditions. The hospital bed offers height adjustments, head and foot adjustments, and a head and footboard.

**Specialized Mattresses**

Group I Mattress
Mattresses and mattress overlays designed for healing of minor skin ulcers.

Group II Mattress
Powered air beds and alternating pressure mattress are prescribed for individuals with severe skin breakdown.
Accessories

**Bed Rails**
Available in half or full size, bed rails are useful to assist with repositioning self in bed.

**Mattress Covers**
Protects mattress from moisture or stains. Can be useful during potty-training. Is available in various sizes to accommodate household furniture.

**Over the Bed Table**
Keep important items close by with the use of the over the bed table. Rolls for easy portability.

**Wedge**
Available in 7, 10, and 12-inch heights, bed wedges can be used at the head or foot of the bed. Especially useful to for respiratory issues.

**Leg Lift**
Made of reinforced webbing. Helps lift leg into bed, wheelchair, or car.

**Trapeze**
A trapeze helps one change position while in bed and aids in the transfer from bed to wheelchair with minimal attendant assistance. The trapeze units have a wide range of height adjustments and handlebar positions to maximize patient accessibility. The unit can be installed quickly and easily on a floor stand or hospital bed.

Transfer Equipment

**Gait Belt**
A gait belt is a safety device used for moving a person from one place to another. The belt is also used to provide support during transfers and walking.

**Transfer Board**
Transfer boards promote safety during transfers from one surface to another of similar height (bed to wheelchair, wheelchair to toilet, wheelchair to car seat, etc.). They are typically made of wood or plastic and come in a variety of shapes and sizes to meet the needs of the user.

**Hydraulic Patient Lift**
Created to make transfer situations safe and affordable for patients and caregivers alike. The sling offers comfort and stability during transfers.
Power Patient Lift
Electronic lifting system includes a manual emergency lowering device. Height range allows lifting from floor and high surfaces.

Seat Lift Chairs
Seat Lift Chairs
Engineered to provide a smooth transition from sitting to standing. Available in a wide variety of styles, upholstery choices, and weight capacities.

Shower and Bathroom Equipment

Bath Lifts
An incredibly safe way to take a bath in your existing tub without spending a lot of money to redo your bathroom. Simply sit on the seat and press the button to lower into your tub. After bathing, press the button to raise yourself back up.

Walk-In Bathtubs/ Barrier Free Showers
» Roll in shower
» Walk in bath tub
» High end bath bars
» Bath ramps
We offer a wide range of products to promote safety and accessibility in the bathroom. Barrier-free showers and walk-in bath tubs allow for easy access to your bathing area.

Customized safety grab bars can be installed to match your existing decor. A simple bath ramp can prevent falls over thresholds.

Rehab Shower/Commode Chairs

Shower Chair
The mobile shower chair is designed for safe transport to and from the shower. Once the pail is removed, chair easily rolls over most toilets.

Rehab Shower Chair
The rehab shower chair has large rear wheels to allow the user to independently maneuver to/from the shower. The aluminum frame and stainless steel hardware provides optimum rust resistance.

Bath Benches

Bath Bench
Provides safety in the bath or shower. Suction cups add more security.

Transfer Bench
Transfer benches extend beyond the edge of the bathtub and are designed to help make transfers in and of the bathtub as safe as possible.
Bath Chairs

**Bath Chair**
Fits inside the bath or shower. The backrest provides added comfort.

**Folding Shower Chair**
The folding shower chair with back provides a safe seating surface and folds easily for storage or travel.

Commode Chairs

**Commode Chair**
Serves as a toilet safety frame, raised toilet seat, or stationary commode for use outside the bathroom. Features snap-on seat and lid, splash shield, removable backrest with wing nuts, nonskid rubber tips, and armrests for added comfort.

Safety Equipment

**Grab Bar**
Provides security in the bathtub or shower, and offers individuals of all ages enhanced stability while standing or sitting.

**Toilet Rails**
Aids in getting on and off the toilet.

Miscellaneous Bath Equipment

**Handheld Shower**
Easy to install and fits most existing showers. Perfect for those hard to reach places.

**Shampoo and Body Wash**
A variety of products are available including rinse-free formulas.

**Shampoo Caps**
A convenient way to wash hair without water. The cap fits over hair and is filled with rinse-free shampoo.
Long-handled Sponge
Long handle bath sponge assists those with limited reach.

Toilet Aid
The toilet aid helps people who have difficulty bending or limited use of their hands and arms to function independently when using the toilet.

Cast Protectors
Specially designed opening stretches to fit over the cast and then returns to its original shape to fit snugly against the arm or leg. Ideal for keeping casts, bandages or wounds dry while showering.

Power Wheelchair Lift
A perfect solution for lifting and storing your power wheelchair in your vehicle. A docking device is connected to your power wheelchair, and with the use of a hand-held pendant, your power wheelchair is safely and easily lifted.

Scooter Lift
The scooter lift enables your scooter to be safely lifted and stored inside your vehicle. Options are available for secure storage behind your vehicle as well.

Adaptive Aides

Left-foot Accelerator
Driving control unit designed to enable drivers with right lower extremity disabilities, such as a hemiplegia or amputation, to drive standard vehicles.

Hand Controls
A spinner knob presses firmly against the palm giving added strength and control for easy driving. Various styles are available to provide secure steering.

Handybar
Inserts into the door frame to assist with getting out of a vehicle. In an emergency can be used to break a side window and cut the seat belt.

Vehicle Adaptations

Wheelchair Lift

Manual Wheelchair Lift
This device lifts and stores your unoccupied manual folding wheelchair inside your vehicle at the touch of a button. Simply connect the docking device, push a button, and let your wheelchair lift do the heavy lifting for you!
Vehicle Ramps
Styles that are portable or installed in the vehicle can provide easier vehicular access with a wheelchair.

Accessibility

Ramps
Accessibility into the home can be greatly improved with the use of threshold, modular, and multi-fold portable ramps.

Stairway Lift
Stairway lifts are the perfect solution to home accessibility – taking you up and down your stairs, safely, comfortably and effortlessly. We offer both indoor straight and custom-curved rail stair lifts.

Vertical Platform Lift
The vertical platform lift provides a rugged, reliable and affordable solution for individuals and caregivers who need assisted access to a porch or deck.

Pain Management

TENS Units
Transcutaneous electrical nerve stimulation is a non-invasive, safe method to reduce pain, both acute and chronic. Under the guidance of a physical or occupational therapist an application of electrical current is applied through the skin for pain control.

Traction Units

Cervical Traction
Following set-up by a physical therapist, clients are able to use traction without assistance. The compact case makes it easily portable.

Lumbar Traction
Clients are able to perform low-back traction in their home after training from a physical therapist.

Over-the-Door Traction
The kit contains everything needed for self administered cervical traction. It mounts easily over the top of a standard door without tools or permanent installation.
Miscellaneous

Biofreeze
A fast-acting, penetrating, and long-lasting pain reliever. Applied to the affected area it provides a warm sensation and increased blood flow.

Sombra
Relieves minor aches and pains of muscles and joints associated with arthritis, simple backaches, strains, and sprains. Absorbs quickly with a refreshing orange scent.

Therabeads
Microwavable pads offer moist heat for minor muscle pains.

Hot/Cold Packs
Reusable packs that can be utilized for hot or cold therapy.

Rehabilitation Rental Equipment

CPM Units
Continuous passive motion equipment is often prescribed following knee surgery or joint replacement. The CPM unit is used to gently flex and extend the knee joint to improve motion and prevent stiffness from developing.

Daily Living Aids
Meal Preparation

Dinnerware
A practical solution for people with disabilities who have difficulty eating independently due to restricted hand movement.

Utensils
Utensils with large handles, angled handles, or added weight to make dining easier.

Meal Protectors
Offer spill protection and help minimize damage to clothing.
**Reachers**

Designed for use by individuals with reduced arm and hand strength. Allows individuals to reach objects without significant bending or stretching.

**Scissors**

Unique cushion-grip handle offers more comfort and control for individuals with limited hand motion and strength.

**Dressing Aids**

**Elastic Shoelaces**

Laces designed to convert any shoe to a slip on for people who have difficulty tying shoes. The user simply laces the shoe and pulls the laces to the desired tension.

**Sock Aid**

The long straps eliminate the need to bend over or pull up your leg when putting on your socks. Large loop handles allow for easy pulling for those who may have arthritis or a weak grasp.

**Card Holder**

Card Holder

Allows user to enjoy playing cards without the effort of having to hold them.

**Breast Pumps**

Breast Pumps

The Medela Pump in Style is a complete pump system, with removable workspace, and stylish accessories which make this the best choice for a nursing mother on the go.

**Diagnostic Equipment**

**Blood Pressure Kits**

An easy-to-use instrument, including everything needed for home blood pressure monitoring.

**Stethoscopes**

Stethoscopes are used to obtain basic vital signs and to listen to heart and lung sounds.

**Thermometers**

Body temperatures are easy and accurate with the use of a digital thermometer.
Supports

Upper Extremity

Cervical Collar
Used to limit cervical flexion, extension, or rotation. Can be helpful for herniated disks, pinched nerves, fractures, muscular strains and sprains.

Shoulder Immobilizer
Limits movement at the shoulder joint. Often used following shoulder surgery or dislocation.

Arm Sling
The arm sling is designed to provide support and even weight distribution for the arm with the use of an adjustable neck strap.

Tennis Elbow Support
For comfort and support during activities that involve elbow strain.

Wrist Support
An excellent support for treating and reducing the chance of carpal tunnel syndrome and tendinitis.

Lower Extremity

Trochanteric Belt
Provides support for unstable sacroiliac joint, the lumbosacral joint, and pelvic fractures. It is comfortable to wear and unobtrusive under clothing.

Ankle Support
Ankle supports provide joint protection to people with weak or injured ankles. Others use ankle supports during physical activity to help prevent sports-related injuries.

Heel Protector
Can be worn on either the heel or the elbow to help reduce pressure and eliminate risk of ulcers on those sensitive areas.

Abdominal

Abdominal Support
An adjustable velcro fastener for comfortable fit and abdominal support.

Knee Support
Provides knee protection while still allowing comfort and movement.
**Urological Supplies**

**Urological**

**Leg Bag**
Discretely collects urine, easily attaches to the leg.

**Night Drain Bag**
The large capacity bag allows for collection of urine overnight. Ideal for individuals with catheters.

**Bed Pan**
Bed pans allow a person in bed to complete toileting.

**Urinal**
Available in male and female styles. Constructed of durable plastic.

**Ostomy**
A variety of ostomy supplies are available to meet an individual’s needs.

---

**Wound and Post-Surgical Care**

**Dressings**
Available in different sizes and shapes to promote healing of wounds and surgical sites.

**Sponge/Gauze**
Various sponges and gauze products are available to facilitate skin healing.

**Paper Tape**
Adheres gently but firmly and paper tape is available in a variety of widths.

**Lotion/Ointments**
A variety of lotions and ointments are available to condition skin, provide protection as a moisture barrier, and/or soothe irritated skin.
Exercise Therapy

Lower Extremity Ergometer
Allows people to exercise their upper or lower extremities while in a stationary position.

Resistance Bands
Resistive exercise bands are color-coded according to level of resistance.

Exercise Balls
An exercise ball is a fun, yet challenging way to stretch, tone, and tighten your body.

Hand Exerciser
Allows strengthening of the hand muscles.

Shoulder Pulley
A simple, effective, and economical shoulder pulley to enhance range of motion.

Service, Installation and Repair

In addition to receiving quality products you will benefit from our superior service. Our rehabilitation technicians repair and maintain the products we sell. We extend this service to your home through our delivery service that can pick-up and deliver your equipment. Follow-up visits and service may also be scheduled to ensure continued satisfaction.
